8/29/16	Choked while eating - contacted OSU vet	Resolved on its own	Rachel Royston, Dee Miller			
9/1/16	Chiropractic	Subluxed right TMJ, C1-RS, C5-XL, L4-L6 RP&P, LT PI & Rt ASI	Dr. Jill Beaty (RR)			
9/24/16	Farrier	Trim	George Scott			
10/5/16	Snotty nose & runny eyes	Checked vitals: T-99.1, P-40, R-18. No treatment given.	Madison Rogers			
10/19/16	Kicked out 3 times during class	Bute given before class the next day. Looking into more Chiro care	Feed Team			
10/25/17	Dewormed		Madison Rogers			
11/04/16	Choked while eating	Roled in his stall 1x acted sluggish, head down not wanting to move. Checked vitals and for gut sounds T:98.9 bpm: 38 R: 16. Started coughing about 5x and was able to get something up. Cleared on his own and was acting normal after that. stayed to monitor him about 30min. Was acting normal and took a drink. Treatment-lightly soak feed and add rock to slow down eating.	Madison Rogers			
11/05/16	Chiropractic	Subluxed C1-LP, C5-XL, T18-L1P, L2/L3 LP, Lt. PI & Rt ASI. No movement in LT llium joint.	Dr. Jill Beaty (RR)			
11/07/16	Farrier	Trim	George Scott			
11/08/16	Refused to move in class and kicked out when asked to move.	Removed from class. Bute pm and next day a.m.	Rachel Royston			
11/12/16	Put his front right leg through his stall while pawing during AM feed	Feeder was able to help him get his leg back through, he stayed calm, no injury- monitor for soreness	Elora Wymore			

11/14/16	Assessed by Madison & Rachel to see if he is cleared for class	Evaluated gait and tenderness. Determined that he was ok for class, but gave a gram of bute with PM feed to make sure he would be comfortable. Also determined that he was only ok for smaller riders, not Michelle M, who is older and leans back and to the side a lot.	Rachel Royston			
11/17/16	Farrier	Trim	George Scott			
12/21/16	Farrier	Trim	George Scott			
12/28/16	Checked mouth for sores because of bad hay	Mouth was ok	Rachel Royston			
02/02/17	OSU/Purina Assessment for Nutrition	Data Collected. Drs are concerned for Batman's health. Agree that he should be on dry lot and also want him to be muzzled to see if he loses weight. If he does not, they think he should be tested for insulin resistance.	Rachel Royston/Dr.Lyndi Gilliam			
02/06/17	Farrier	Trim	George Scott			
02/07/17	Would not move in class	Batman would not move out in class 3 times, but after waiting a while he would walk on. We removed him from classes and have him on rest until he can see the chiropractor on 02/18/17.	Rachel Royston			
02/18/17	Chiropractic	Batman did not have much out of place! Dr. Jill adjusted his right SI, C1 & C6. His back was not sore or his pelvic area like before. She says there is no structural or muscular reason why he is not moving out in class. We both wonder if he will feel better once he loses weight. Otherwise, he might just be done with the job.	Dr. Jill Beaty (RR)			
2/28/17	OSU LA Hospital - Insulin Resistance Testing	Since Batman continues to gain weight in the dry lot we decided to have him tested for EMS. Physical exam showed everything was healthy except his over condition at 9/9 on the BCS scale. We will have results in 2-5 days. Weighs 1330 and should weigh 950.	Rachel Royston / Dr. Jamieson			
3/7/17	Insulin Testing Results	Batman is not insulin resistant and has no signs of laminitic development. He is under no restrictions for working out to get the weight off. Dr. Jamieson is prescribing a thyroid medication through Valley Vet to help speed up his metabolism.	Rachel Royston			
3/9/17	OSU LA Hospital	weight 1280# Complete physical examination was within normal limits. Detomidine and butorphanol sedation was given in the vein and a complete oral examination was performed. Enamel overgrowths on the 311 and 411 (lower last molars), fractured upper incisors (101,201). Routine dental float was performed. Sheath was very dirty with a lot of dead skin and dripping smegma. Batman should have his sheath cleaned every 6 months because this could be precancerous.	Dr. Gilliam & Vet Students /Rachel Royston & Kenzie Hindman			
3/20/17	Farrier	Trim	George Scott			
3/24/17	Dewormed	SmartMax	Rachel Royston			
4/6/17	Pour On Parasite Control		Rachel Royston
